Career Objective

Enthusiastic student with a strong interest in Web Development, Machine Learning and LLMs. Committed to work hard, learn new things and bringing positive impact to society through technological innovations.

Education

NMAM Institute of Technology, Nitte, Udupi , B-tech in Artificial intelligence and machine learning CGPA: 9.20 Aug 2022 – Present

SDM Pre University college, Ujire, Mangalore, Pre-University Course 2020 – 2022
Percentage: 84.83

Experience

Full-Stack Intern, Tulucentre – Nitte University, Derlakatte, Mangaluru June 2024 – Dec 2024

- The First-Ever Digital Dictionary for the Koraga Language. Also developed a tulucentre landing page using PHP
- During my internship at TuluCenter, Migrated a large Excel dataset to MongoDB and developed a dynamic frontend using React. Key features included dialect-based search, “Word of the Day,” popular searches, and an “About Us” page. This project not only supported the digital preservation of an indigenous language but also enhanced my skills in handling real-world datasets, database integration, and building interactive UIs.

Tech-Stacks used : React, php, Tailwind CSS, MongoDB, GSAP, Prisma, Figma, TypeScript, Firebase

Projects

JapLingua - Japanese learning Platform japlinguav01.onrender.com/

- Built a Japanese learning platform with Kana flashcards, multilingual translation (Japanese/English/Romaji), pronunciation support, etiquette chatbot, and Kanji OCR with API-based meanings. The platform is actively used by college students to learn Japanese in an interactive way.

Tech Stacks: React, Tesseract OCR, REST APIs, Chatling, Text-to-Speech, Cursor AI

Smart AI-Powered Ticketing System Aug-2024

- Developed a smart AI-powered ticketing system enabling users to submit support tickets, automatically processed to improve efficiency. Integrated an AI agent to read, categorize, and generate responses, minimizing manual work. Implemented user authentication and a responsive frontend for seamless interaction.

Tech Stacks: React, Inngest, Gemini AI, JWT Authentication, Express JS, MongoDB

Smart PDF reader Oct-2024

- Built a PDF reader with text summarization, text-to-speech, and QA using Hugging Face models. Created an intuitive interface with Gradio for seamless document interaction.

Tech Stacks: Python, Hugging Face Transformers, Gradio, PyPDF2, Jupiter-notebook

My Personal Portfolio Website hithesh-portfolio.vercel.app

- Built a responsive portfolio website using React, Tailwind CSS, and GSAP, with a custom design made in Figma. Showcases interests, hobbies, projects, and a resume to highlight skills and experience.

Tech Stacks: React, Tailwind CSS, GSAP, Figma, JavaScript, Git

Skills

Languages: English | Japanese(Beginner) | Hindi | Kannada | Tulu

Tech Skills: Python | React | Svelte | SQL | MongoDB | JavaScript | Tailwind CSS | HTML | CSS | Express and NodeJS | C programming | Java

ML Skills: preprocessing | Model Evaluation | Deep learning | CV | NLP | LLM | Hugging Face | Gradio / Streamlit | Scikit-learn | TensorFlow | Pandas nad Numpy | Hyperparameter Tuning

Tools known: VS code | Eclipse | PyCharm | Figma | GSAP | GitHub | Postman | Docker | Vercel

Interpersonal Skills: Adaptability | Team Collaboration | Creativity and Innovation

Other Skills: Prompting techniques | Graphic design
